I have been working on the podcasts and getting them ready to release, I praise God for the prayer of the saints for the wisdom to do this properly.

How this is going to work?

I am going to use "itunes software" (www.itunes.com) it is totally free software. I will be submitting the podcasts to itunes and they should be live within a week, I will post updates for you.

Also the podcasts for the sermons will be posted to sermonindex and will be archived here:

The most excited thing about the podcasts will be that they will appear **all across the world!** I will be submitting it to over 100 sites. Do pray that even unbelievers come to hear the gospel of Jesus Christ and believe!

Podcasts are simply media files that are in radio format, so its digital radio shows done simply. And the great thing is that it works great with software such as itunes, which once you subscribe to the podcasts they will update AUTOMATICALLY and then you can even put them up onto your mp3 player or ipod.

I know alot of this is confusing to people, do ask questions for clarification. And keep tuned to changes to the front page of the site and the addition of the podcast section!

Once I have added all the 4 podcasts and they have been approved with the itunes directory then I will publish a section on the front page for easy access to them. If you have any questions let me know.
