SUPPORT: Server Upgrades needed soon and other ministry costs. - posted by sermonindex (), on: 2006/6/22 11:32

I just wanted to set before the body here at SI a few costs and needs that have come up recently and are soon coming. Yes, there is some money definetly needed to run this ministry.

- Renewal for 1 server has come up \$100
- Gospelcom Alliance membership fee \$300
- External Hard Drive \$200

ALSO THERE ARE SOME FUTURE NEEDS:

-Media Server upgrade (\$500-1000)

**right now there are 105gb of sermons available and I think in the next half year or less it would be good to get in a more stable place with live backup and more space.*

-CD 5-1 Burner (\$700)

**I have been handing out many materials to people I met regularly and there is definetly a need to get a more robust solution to get more cds out to people for free thus the necessity for this solution.*

-Property.. (this is something people can start to pray about is God providing a future property for sermonindex to work out of, this might be through me getting part-time work after school and other brothers helping out tangibly or God laying on someone's heart to give a property or something to that regards but there would definetly be fruit in having a homebase for sermonindex in the near future, do pray about this).

If you want to help out any of these costs you can do so below:
Donations...

Quote:
-----External Hard Drive \$200

I have purchased a hard drive today and begun doing a newer backup of the 111gb of sermons now available on SermonIndex. Do pray that the backup works well. Please also do pray about supporting sermonindex.

Thank you to the brother that had in his heart to help cover this cost of this ministry. I am still in the process of backing up sermonindex on the \$200 hard drive I bought.

If you have it in your heart do help support toward other costs of this ministry that are needed.

Re: - posted by sermonindex (), on: 2006/6/30 12:33

AS for the immediate needs of raising \$600 for the first 3 ministry costs there has been \$200 raised thus far leaving \$400 still needed.

This is over 30% raised thus far, thank you for those that have support and prayed so far.

And just to let everyone know about the purchase of the "External Hard Drive" I have finally completed the entire backup of sermons media to date which is **113 gigs** of information in audio and video files. This is definitely a peace of mind to have a ENTIRE backup of the media from the site now.

I am looking into other ways to back it up online. thanks for the continued support.

There still is a need for more support to help cover costs of this ministry. Prayerfully consider.
