Hi Broter,

I thank you for your heart to get the word of God out to people and share how these sermons have impacted your life. I have gotten a personal letter from Keith Daniel to ask not to have people do that with his sermons putting music behind it. It grieved him and he desired it not to happen, especially off sermonindex which I agreed to and took down all the compilations that had his voice in it. I thought I would let you know, so if you desire to get that out there that is your choice, but I cannot endorse it or allow linking to the file from sermonindex. I hope you understand.
