Usage Question on Thread Sort Order - posted by Koheleth, on: 2007/1/27 14:48

My threads always default to Newest First and I always want to see Oldest First, or at least have that be the default. Is there any way to change that?

Thanks!

Tears of Joy,

Thanks so much for your reply. I have used the dropdown before, but my problem is when I open up a dozen threads to look through. I am wondering if there is a way to get the default order of the threads to oldest first. When I change the dropdown in one thread, it doesn't affect any other threads, but I would like it to.

Thanks!

Yes. Go to **View Account --> Edit Profile --> Comments Sort Order --> Save Changes**

That's it. If you have any other questions let us know.

God bless you.
