Its been by God's grace that I actually found [www.crossmap.com](http://www.crossmap.com) and few months ago as they were starting to map out there creation of the chrisitan portal. I offered to get my sermons on their site and they accepted without quams. They caught the vision and passion behind SermonIndex and really saw how it could compliment Crossmap and their vision. So they have recently gotten over almost 70-80% of the audio sermons onto one of their servers in the media player format.

You access the entire database of their sermons at: <http://sermons.crossmap.com> all their sermons are streamable but not downloadable.

here is an example of the streaming window that popups up when you click on a sermon title at crossmap.com

I encourage all users of SermonIndex.net to use Crossmap to listen to sermons in the meanwhile. Until the sermons are back up at SermonIndex. Praise the Lord for His purposes and ways He's always in control.
