Saints,

Kent Hovind shares some startling facts about evolution and how the teachings of this theory are preparing people for fascism and communism in America and abroad. He goes into some details about freemasonry and other issues which many people are quite oblivious to. This recording is quite valuable for some of its content conveyed so that the Christian is not "unaware" of the schemes of the devil.

These files are in the mp4 format and require itunes.com to play.
