I have talked with Sermonaudio.com where I have been hosting about 150 sermons there for almost 2 years.. longer than I have had sermons up on SermonIndex.net. They have agreed to still host the majority of the sermons and possibly a few more from select speakers on their site still under a classics category. I am glad they are willing to do this. I have been paying \$40USD/mo and this is a nice burden to be released, I am trying to streamline some things so the monthly cost to run this ministry can be lowered.

Praise God for His goodness and allowing the sermons to stay on the site. As of right now my section is still live: http://www.sermonaudio.com/source_detail.asp?sourceid=si

but it will close down and the classics section will open up elsewhere on their site. If you have any questions regarding this let me know.
