

**SermonIndex Support :: transferring sermons onto an Sony MD player problems****transferring sermons onto an Sony MD player problems - posted by osee, on: 2004/9/15 18:02**

I am using realplayer to play sermons and transfer to my Sony Net MD walkman. I was doing this succesfully for a couple of days yet am not able to now. At 89% downloaded it stops and tells me file type not supported. I have tried changing some settings ... to no avail! Is there a better software to use for this? Thank you.

I used to use the Sony MD player, it supports only paticular file bitrates. ie 16000khz stereo etc. Doesn't sony have softw are that comes with it? Does this happen for all sermons or just some? perhaps some of th sermons you are downloadin g are bitrates not supported?
