Hi my brothers and sisters. I wanted to ask you to pray for my Jessica. She hasn't been feeling well and had a fever, then she found what looked like a spider bite on her thigh. The doctors at the emergency room last night said it was a spider bite, but it sort of looked like staph infection. They gave her antibiotics and sent her home. Today she is still running a fever and her leg is more sore. Please pray for healing for her no matter what it is. Thank you all.

I will be praying for Jessica, for healing and strength in Him.

God bless

I will be praying.

Also, you might check out the benefits of a charcoal poultice - from what I hear, it can draw out poisons that antibiotics do not seem to touch.

How is Jessica doing by now? I also have had a brown recluse spider bite about 20 years ago and, obviously, I survived!
