Jonathan Edwards Reading Table

Description: Samuel Hopkins, his first biographer, said Edwards "read all the books from which he might hope to derive any aid in his pursuit of knowledge." On this rotating desk of his own design, venerable tomes of Puritan theology sat side by side.

I thought this was pretty awesome! I showed it to one dear brother and he wants to build one! Maybe SI could start to produce them. hehe. Seriously it would be a great concept for studying I want to try and get one or make one God willing one day.

Great idea. Looks a bit like my desk only my books are more given to the vertical than the horizontal. My wife looks in here from time to time and quotes Jeremiah 26:18.. Jerusalem has become heaps!
