i had the same problem as you i think. i was using a download manager called DAP and when i downloaded a file it was not in mp3 format. i found that when i right-clicked and clicked on "save target as" i had no problem downloading as mp3 . if this is not your problem let me know and i will help you all i can

God bless

Hi Chester.. Simply right click on the sermon titles and save target as. Note you will have to rename the file to the sermon title. Once its saved to your computer then you can use any CD burning package to make an "audio cd" with the mp3 file. Most CD burning software converts the mp3 file to an audio file on the fly.
