The TPP (Trans-Pacific Partnership) trade pact has been drafted over the past 2 and 1/2 years by the USA and 8 Pacific countries. Of the 26 chapters only 2 have anything to do with trade yet it is being pushed and promoted as a trade bill. It is a trojan horse far worse than NAFTA. It is a wish list by the multinational corporations to bypass US laws and regulations. If it passes, any other country or countries can join and I'm sure many will. It bodes ill for democracy and power by the people for the people. We must fight this thing tooth and nail. Here is a must see video with more details:
