

SermonIndex Support :: Sermon Downloader app

Sermon Downloader app - posted by jho2 (), on: 2017/12/19 17:28

I have just installed the Sermon Downloader (win app).

Is there a way to change the default download folder?

I would like it to download the sermon to another folder on another drive on my PC?

Thanks!

Josiah

Dear brother,

I could be mistaken but in the installation process it allows you to select the folder location. Again I could be wrong.

Another option is to download all of the sermons of each speaker you want and when the downloading is done "move" them to folder to where you want to store it and repeat that process for all speakers you want.
